Firebase (Auth, Firestore) • REST APIs • Git & GitHub

Responsive Design • UI/UX Implementation • Framer Motion • GSAP

Performance Optimization • Cross-Browser Compatibility

WORK EXPERIENCE

Web Developer & Designer (Freelance)

Self-Employed | Remote

Jan 2021 – Present (4+ Years)

- Built scalable and responsive user interfaces with React, Next.js, Vite, and TailwindCSS
- Implemented authentication, CRUD operations, and cloud data storage using Firebase
- Developed e-commerce and business websites, including product listings and order flows
- Collaborated directly with clients to gather requirements, define scope, and deliver solutions
- Improved performance, accessibility, and cross-browser compatibility across projects
- Managed projects end-to-end, including deployment and post-launch maintenance

SELECTED PROJECTS

Bukkalsland (Houston, Texas)

Web Developer & UI Designer

- Developed a responsive food ordering website using React, TailwindCSS, Firebase, and Cloudinary
- Implemented menu and blog sections to showcase dishes and support external order links. Built admin authentication and managed data using Firebase Authentication and Firestore

HTX City Rentals (Houston, Texas)

Web Developer & UI Designer

- Built a modern event rental web application using React and Framer Motion
- Implemented cart and quote request workflow using React Context API
- Integrated EmailJS for automated inquiry and confirmation emails

UI/UX Designer Portfolio (Lagos, Nigeria)

Web Developer & UI Designer

- Developed a responsive portfolio website using Next.js and TailwindCSS
- Translated Figma designs into pixel-accurate, accessible components
- Optimized performance, accessibility, and cross-device compatibility
